

KANISH R

Associate Software Engineer | Full Stack Developer

Angular | React | Java | Spring Boot | Node.js | REST APIs | PostgreSQL | MongoDB

Coimbatore, Tamil Nadu | +91 8754766195 | kanishr110@gmail.com | LinkedIn: linkedin.com/in/kanish11 | GitHub: github.com/kanishr11

PROFESSIONAL SUMMARY

Associate Software Engineer / Full Stack Developer with 1.4+ years of professional experience building, maintaining, debugging, and enhancing production ERP applications. Hands-on experience with Angular, TypeScript, Java, Spring Boot, REST APIs, and PostgreSQL. Currently working as a production developer, independently handling feature development, production issue investigation, root-cause analysis, API troubleshooting, performance optimization, bug fixes, and database-level corrections. Strong JavaScript/TypeScript foundation with hands-on React, Node.js, Express.js, MongoDB, and payment integration through a MERN e-commerce project. Independently developing an enterprise HRMS and Leave Management System using Angular, Spring Boot, PostgreSQL, JWT, RBAC, and multi-tenant architecture.

TECHNICAL SKILLS

Frontend: Angular, React, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, Tailwind CSS, RxJS, Angular Signals

Backend: Java, Spring Boot, Spring Security, REST APIs, Node.js, Express.js

Database: PostgreSQL, MongoDB, MySQL

Security: JWT, Role-Based Access Control (RBAC), Spring Security

Tools: Git, GitHub, Postman, pgAdmin, Maven, VS Code, Cursor

Production: Production Debugging, Root Cause Analysis, API Troubleshooting, Performance Optimization, Bug Fixing, Code Optimization

PROFESSIONAL EXPERIENCE

Associate Software Engineer — TekFilo Innovation Pvt. Ltd.

May 2025 – Present | Coimbatore, Tamil Nadu

- Develop and maintain production ERP applications using Angular, TypeScript, Java, Spring Boot, REST APIs, and PostgreSQL.
- Independently handle production development activities including feature development, bug fixing, debugging, API investigation, database corrections, and application enhancements.
- Work across frontend, backend, API, and database layers to identify root causes and implement production-ready fixes.
- Develop and integrate REST APIs used by Angular frontend modules for business workflows.
- Investigate API and application performance issues and contribute to query, backend, and frontend-level optimizations.
- Work with PostgreSQL for data validation, troubleshooting, query analysis, and production corrections.
- Develop and enhance features across 20+ ERP modules covering Trading, Manufacturing, Accounts, Inventory, and Reports.
- Handle production issues from investigation through implementation and verification with minimal supervision.
- Review existing source code and business workflows before implementing changes to reduce regression risk.
- Use Git and GitHub for version control, source management, and code integration.

KEY PROJECTS

Enterprise HRMS & Leave Management System

Angular | TypeScript | Java | Spring Boot | PostgreSQL | Spring Security | JWT | RBAC — In Progress

- Independently designing and developing an enterprise-oriented HRMS and Leave Management System from the ground up.
- Building the frontend using Angular with reusable components, services, reactive data handling, and role-based UI behavior.
- Developing backend REST APIs using Java and Spring Boot.
- Implementing authentication and authorization using Spring Security, JWT, and Role-Based Access Control (RBAC).
- Designing PostgreSQL structures for companies, users, roles, permissions, employees, leave management, and business workflows.
- Implementing multi-tenant architecture with company-level data isolation.
- Developing authentication, company management, employee management, leave management, dashboard, and access/permission workflows.

MERN Stack E-Commerce Application

React | Node.js | Express.js | MongoDB | JavaScript | Payment Integration

- Developed a full-stack e-commerce web application using the MERN stack.
- Built responsive product browsing, product details, shopping cart, checkout, and administrative functionality using React.

- Developed backend REST APIs using Node.js and Express.js.
- Designed MongoDB collections for users, products, orders, and e-commerce data.
- Implemented application authentication and business workflows and integrated online payment functionality into checkout.

Developer Portfolio

Angular | Tailwind CSS | TypeScript | Vercel

- Designed and developed a responsive personal developer portfolio showcasing projects, technical skills, experience, and certifications.
- Built reusable UI sections and responsive layouts using Tailwind CSS and deployed the application publicly.

EDUCATION

Bachelor of Technology — Information Technology

Karpagam College of Engineering | 2021 – 2025 | CGPA: 7.6 / 10

ADDITIONAL STRENGTHS

- Strong hands-on experience in production application development and debugging.
- Comfortable working across frontend, backend, API, and database layers.
- Able to understand existing source code and business workflows quickly.
- Fast learner with the ability to transition between related technologies and frameworks.
- Experience developing both enterprise applications and independent full-stack projects.
